

North Middleton Township Stormwater Fee Study

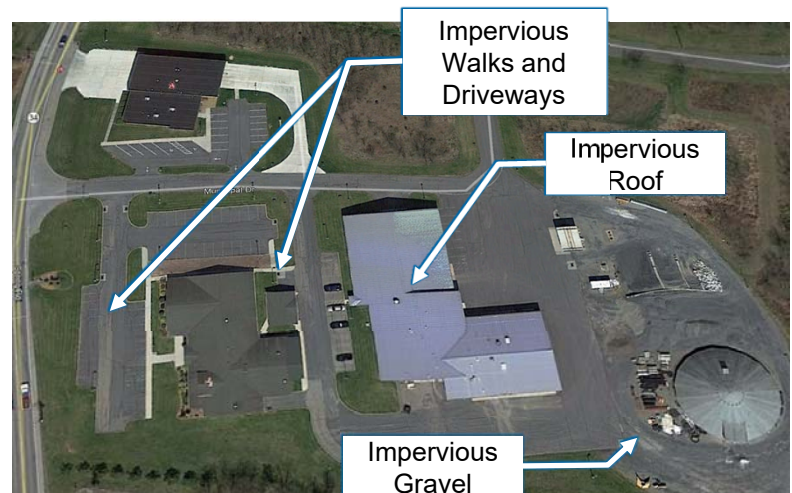

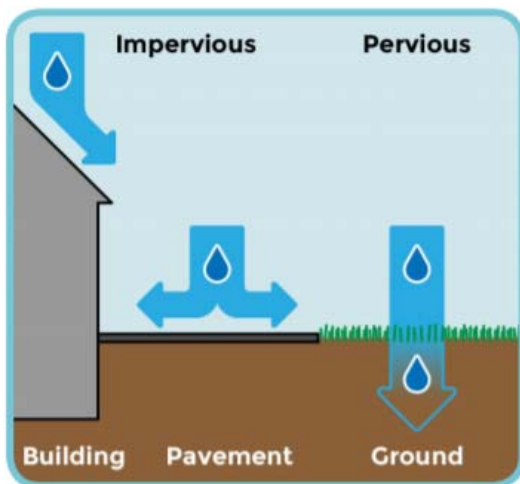

Why a Stormwater Fee?

North Middleton Township (NMT) is one of many municipalities in Central Pennsylvania and throughout the state where the full burden of new Federal and State regulations are being implemented without any offsetting funding.

Basis for Township Wide Fee

- Residential and Agricultural Properties will be charged a flat fee, regardless of parcel size or impervious cover
- Non-Single Family Residential properties (i.e. commercial properties) will be charged fees in proportion to how much impervious surface is on site
- Equivalent Residential Unit (ERU) represents the average impervious area in a typical residential lot. For NMT this is 3,100 square feet (sf)

Stormwater Fee Will Provide:

- Flood Control Projects
- Mandated Pollution Reduction Plan (PRP) Projects
- Street Sweeping
- Storm Sewer and Storm Inlet Maintenance / Replacement
